

Public Meeting Notice

Public Meeting Announcement

- Event: Community Public Meeting
- Date: July 16th, 2025
- Time: 5:00 PM - 7:00 PM
- Location: Ottawa Town Hall
 - Address: W360S3337 State Road 67, Dousman, WI 53118-9709

Meeting Purpose

- The Wisconsin Department of Transportation has recently identified several roads within the state that may qualify for inclusion in the federally funded High Risk Rural Road Program (HRRRP), a component of the Highway Safety Improvement Program. <https://highways.dot.gov/safety/hsip/hsip-special-rules/high-risk-rural-roads-hrrr>
- HRRRP is dedicated to incorporating low-cost countermeasures for improving hazardous run-off-the-road situations.
- One important Waukesha County road, CTH Z, extending from Northey Road to Scuppernong Creek, is ranked as the 6th highest priority in the state for HRRRP safety improvements.
- During the HRRRP evaluation period (2017-2021) CTH Z experienced 22 total crashes, including 11 run off the road crashes, 1 fatality and 6 serious injury crashes impacting 9 people.
- The Waukesha County Department of Public Works is considering applying for federal HRRRP funding to enhance the safety on CTH Z through the installation of new pavement surface, centerline rumble strips, improved pavement markings, increased and improved signage, and the removal of trees and vegetation within the roadway clear zone safety area.
- Before applying for federal HRRRP funding, Waukesha County would like to share project concepts, gather public feedback and measure public support for the proposed project.

We encourage community participation and involvement. Active participation and communication are critical to the success of this safety initiative, ensuring safer and more efficient roadways for everyone.

Questions about the project or public meeting can be directed to Ethan Moser, Waukesha County Project Engineer @ 262-548-7748 or email to EMoser@WaukeshaCounty.gov
